

The new standard in risk adjustment coding

Take control of your Medicare Advantage and ACA risk adjustment programs with our industry-leading AI coding & QA solutions. Apixio's HCC Identifier delivers speed, transparency, and accuracy so your risk adjustment coding team can do more with less effort.

Is your risk adjustment program capturing the whole truth?

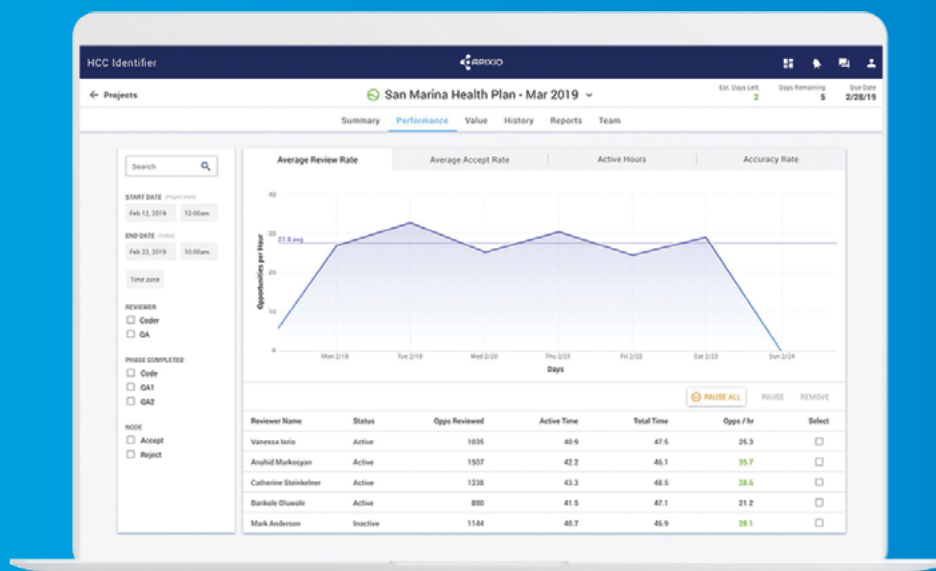

Retrospective chart reviews is a critical risk adjustment activity for Medicare Advantage (MA) and Affordable Care Act (ACA) plans. But performing these reviews manually is time consuming, expensive, and doesn't always capture a full, accurate picture of patient risk.

Apixio's HCC Identifier solution uses artificial intelligence (AI) to streamline the chart review process, provides flexible project management tools to simplify reviewer assignments, and offers project analytics to support internal and external reporting.

4-6X increase in productivity

20% increase in coder accuracy

80% decrease in coding time

“By using Apixio, we’re improving our auditing bandwidth and enhancing the ability of our coders to focus on other chart audits and projects we couldn’t do before.”

JoAnn Hayden, Supervisor of Quality Improvement Programs
SCRIPPS HEALTH PLAN SERVICES

Take control of your risk adjustment program

Benefits

- ✓ **Speed.** Coders are pointed directly to supporting evidence for suspected net-new HCCs, drastically reducing review times.
- ✓ **Accuracy.** AI algorithms find more evidence of supported HCCs than manual review processes alone.
- ✓ **Visibility** Coding managers have direct line-of-sight into project timelines, trends, and ROI.

Streamlined user interface

HCC Identifier's workflows are configurable for initial coding and quality assurance, giving you complete control over project access, chart routing, and reviewer assignments.

HCC Identifier is available as a web-based application for in-house coding teams or a technology-enabled coding vendor solution. Learn more at apixio.com.

AI Analytics for Risk and Quality

Improving healthcare outcomes requires access to the right data at the right time. Apixio is advancing value-based care with data-driven intelligence and analytics. Our AI solutions for risk, quality, and clinical insights unlock actionable information from administrative data and unstructured clinical information. The results drive better clinical decision-making and a smarter approach to healthcare.
