Apixio

Utilize AI-Driven Insights for Complete, Accurate Risk Capture

Apixio's AI-driven, EHR-integrated prospective risk adjustment workflow solution surfaces actionable insights at the point-of-care, enabling comprehensive risk capture and documentation accuracy.

Drive Care Delivery and Outcomes with Apixio's Prospective Suite

Improve Point-of-Care Risk Capture and Care Delivery

In an effort to deliver on value-based care, clinicians are struggling to efficiently manage the operational needs within their office along with the care delivery needs for their patients. With Apixio's AI-powered capabilities, clinical teams are able to streamline processes, effectively close care gaps and ensure complete, accurate clinical documentation in real-time.

Based on Apixio's Best in KLAS Risk Adjustment & Analytics algorithms, our prospective risk adjustment workflow of solutions generates previously known and suspected conditions by utilizing AI-powered analytics to look at structured and unstructured data from the EHR, physician notes, medications, lab results, radiology reports, claims, or other data sources. Our AI-driven workflow powers prospective programs for Medicare Advantage (MA), Medicare Shared Savings Program (MSSP), ACO REACH, and other Alternative Payment Models (APMs).

Our Solutions

Prospective Risk Adjustment

- Prospective Insights
- Pre-Visit Planning
- Insights at Point-of-Care
- Concurrent Review

How Apixio's Prospective Suite Works

1 IDENTIFY

Insights

AI-powered prospective analytics help clinical teams evaluate and close diagnosis gaps, across structured and unstructured data sources.

- ✓ Improve upstream risk capture with a precise, comprehensive list of known and suspected conditions.
- ✓ Review condition suspects and recaptures in a unified report and share diagnosis gaps in existing workflows.
- ✓ Complete project visibility and control over your chart review process.

2 PREPARE

Pre-Visit

AI-assisted triage workflow allows you to identify suspected conditions and close gaps before patient encounter.

- ✓ Review charts 5x faster with our AI-assisted workflows.
- ✓ Deliver high-quality, curated insights within your existing EHR and other platforms.
- ✓ Enhance patient visits by providing clinicians with actionable insights prior to the encounter.
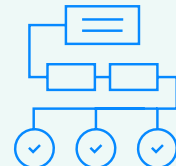

3 CAPTURE

Point-of-Care

Push reviewer-triaged pre-visit planning insights directly into the clinical workflow.

- ✓ Deliver actionable insights with an EHR alert including suspected conditions and evidence.
- ✓ Improve clinical adoption of prospective risk adjustment programs with streamlined EHR workflows.
- ✓ Maximize patient care while spending less time in the EHR.

4 VALIDATE

Concurrent Review

Concurrent workflow ensures complete diagnosis capture and accurate documentation prior to claims submission.

- ✓ Improve completeness of risk capture and recognition accuracy.
- ✓ Drive compliance by resolving discrepancies prior to claims submission.
- ✓ Effectively scale review processes and workflows for patient populations.
