Apixio
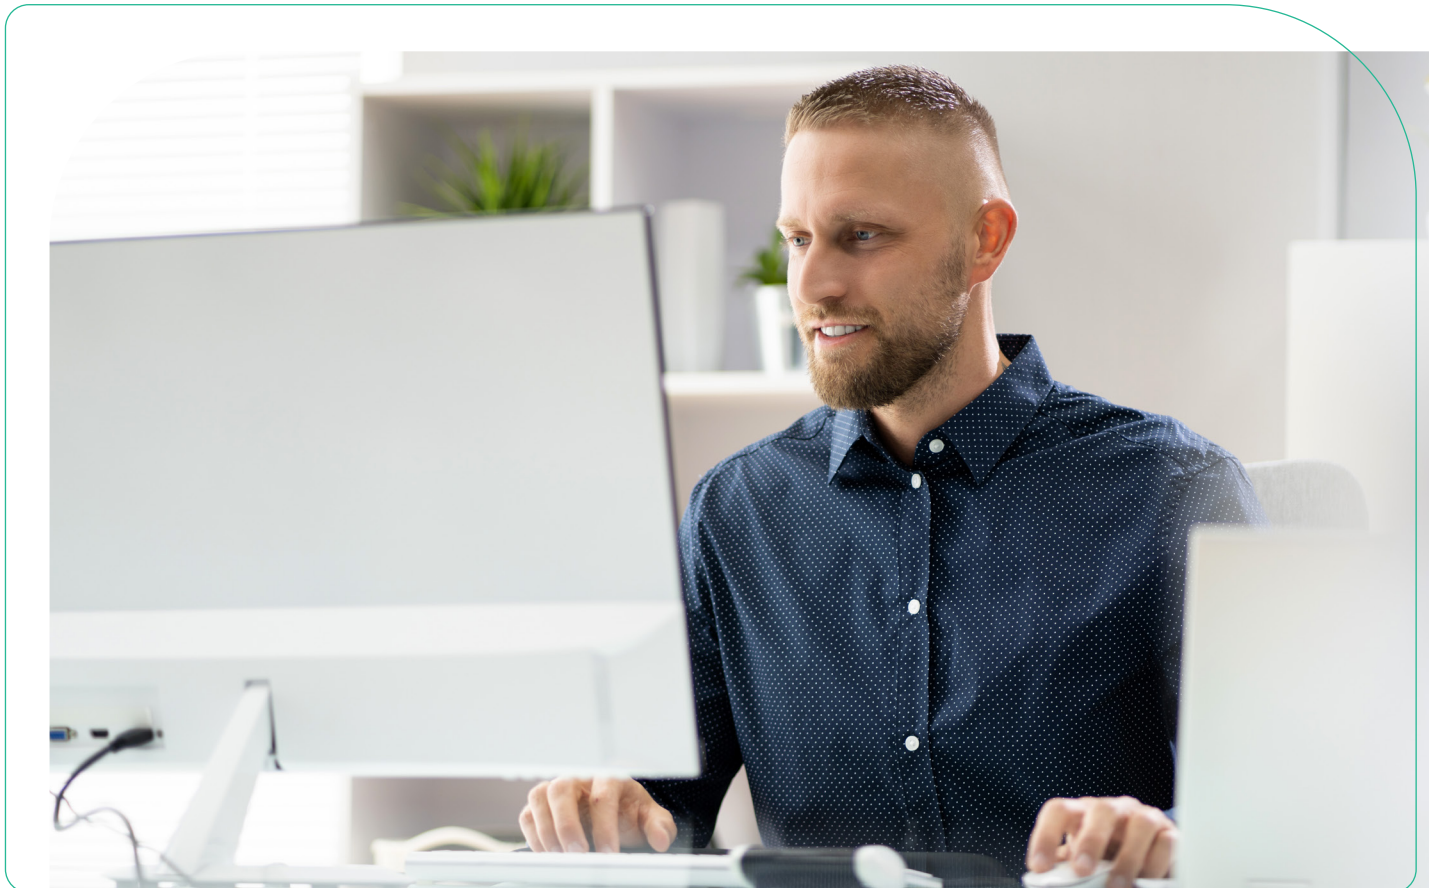

Increase Risk Adjustment Efficiency and Accuracy with AI-Powered Technology

Improve coding and audit efficiency, accuracy, and reimbursement outcomes with AI-powered risk adjustment solutions.

Scale your Risk Adjustment Program with AI

Increase Risk Adjustment Efficiency and Accuracy

Health plans and providers face rising administrative time and costs due to the complexity of risk adjustment in healthcare, driven by evolving reimbursement models and heightened audit scrutiny by regulatory agencies.

Apixio's AI-driven risk adjustment solutions enable teams to expand their review procedures, ensuring a comprehensive and uniform assessment of patient health conditions in support of value-based care

initiatives across MA, ACA, MSSP, ACO REACH, and other APMs.

Leveraging cutting-edge technology, our flexible solutions empower healthcare organizations to improve the accuracy and completeness of risk adjustment programs, streamline administrative processes, and enhance the precision of the longitudinal patient profile for high-quality clinical care.

Our Solutions

Risk Adjustment

- Retrospective Coding
- Prospective and Concurrent Reviews

Improving Your Risk Adjustment Program: From Retrospective Review to Prospective Diagnoses Accuracy

Apixio's AI-powered workflow solutions empower risk adjustment processes along the continuum. From retrospective risk adjustment coding and auditing efficiency, to pre-visit planning, point-of-care gap closure, and concurrent diagnoses accuracy and documentation completeness, Apixio has a solution to fit your needs, whether as a service, application, or AI-powered insights into your existing workflow.

Key Benefits:

- Uncover predicted evidence of supported and unsupported HCCs for review.
- Reduce your audit workload by 80% and focus reviews on charts with predicted at-risk HCCs.
- Parse structured and unstructured data to surface a longitudinal patient record with advanced insights.
- Amplify pre-visit reviews with AI-powered suspecting technology and share diagnosis gaps with clinicians in EHR workflows.
- Ensure complete diagnosis capture and documentation before claims submission.

## Apixio's AI Risk Adjustment Workflow

Submission Ready
Receive a final set of confirmed HCC additions and deletes.

AI-Powered Coding & Auditing
Code and QA charts for retrospective review.

Data Collection
Load structured and unstructured data for chart review.

RETROSPECTIVE

Longitudinal Patient Profile

PROSPECTIVE

Pre-Visit Planning
Optimize chart prep processes with comprehensive AI suspecting and workflow technology.

Point-of-Care
Push reviewer-triaged, pre-visit planning insights directly into the clinical workflow.

Concurrent Review
Ensure complete diagnosis capture and accurate documentation prior to claims submission.

Apixio

Streamline and scale your risk adjustment programs with Apixio.
