

## Revolutionizing Retrospective Risk Adjustment Coding Operations with AI-Driven Insights

**Apixio's AI-as-a-Service Solution for Retrospective Risk Adjustment enables payers, and other healthcare organizations to identify diagnoses accurately and efficiently within their existing coding workflow applications.**

Healthcare organizations responsible for risk Adjustment coding are overwhelmed with the volume of charts to review and need a way to improve their coding performance. Coders strive to capture risk-adjustable diagnoses accurately, but the breadth of medical documentation results in fatigue that can lead to missed coding opportunities. Existing solutions designed to assist coders are challenging to leverage when it's disconnected from the workflow or delays with processing to scale across projects.

### Streamline coding operations with advanced AI technology

Through seamless integration with your existing coding workflow solutions, Apixio's AI-driven engine processes records in real-time, delivering valuable insights directly to your coders for review. Apixio provides ICD and HCC insights for MA and ACA populations, ensuring accurate and efficient coding, minimizing missed coding opportunities, and complementing existing workflows.

## How It Works

**Send documents to Apixio's APIs**

Configured APIs allow documents to be sent and results received in real-time.

**Process documents through Apixio's AI engine**

Identify HCC and ICD codes throughout the document that meet the risk adjustment criteria.

**Deliver insights through JSON output**

HCC and ICD codes are delivered into any workflow application.

## Impact

**90%** average ICD-10 level precision

**3.1** average HCCs per chart

**1.19** average RAF per chart

## With AI Insights Your Organization Can:

### Workflow Integration

Seamlessly integrate AI insights into existing coding solutions without disruption, ensuring a smooth transition and minimal downtime.

### Accurate Insights

Support 1st and 2nd pass coding with accurate ICD insights delivered directly to coders.

### Operational Efficiency

Let AI read thousands of pages of medical records and augment coders reviews with ICD and HCC codes identified.

**Learn how Apixio's AlaaS for Retrospective Risk Adjustment can help your organization deliver insights and optimize performance.**
